

Marbled Murrelet Figures

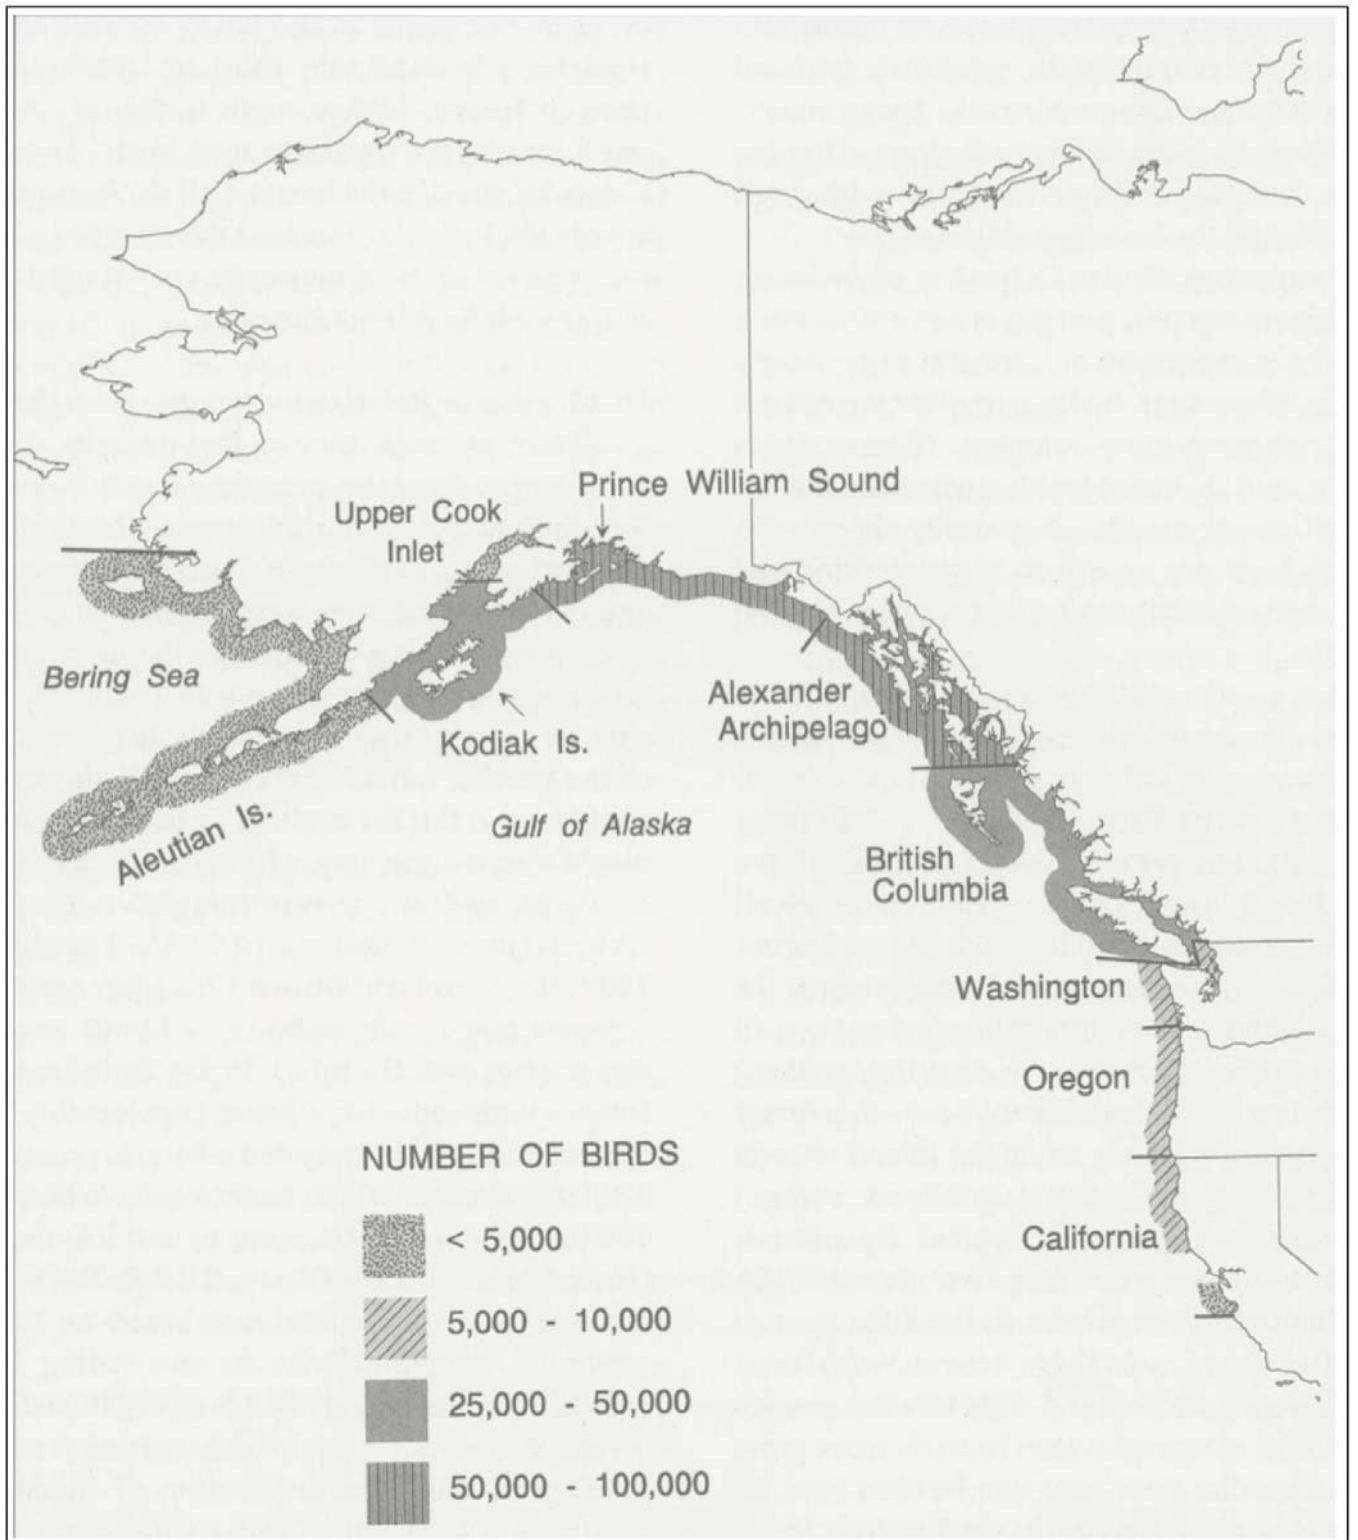

FIGURE 1. Range of the Marbled Murrelet *Brachyramphus marmoratus* and population size along sections of the west coast of North America (from [17]Ralph et al. 1995; reprinted with permission)

Marbled Murrelet Figures

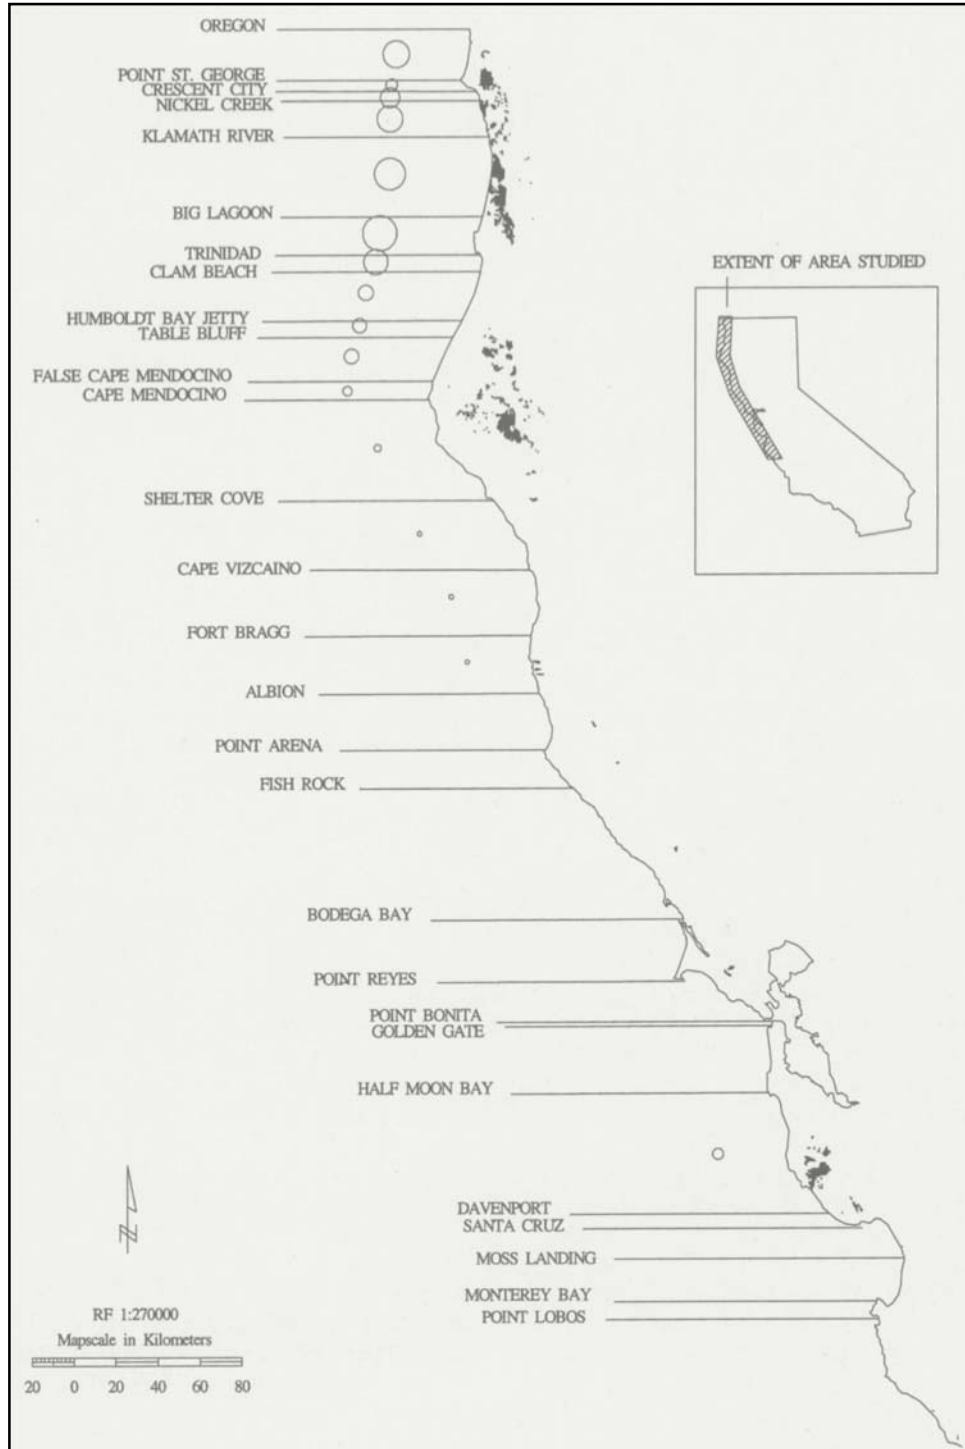

Figure 2. Densities of Marbled Murrelets along California coast by coastal sections. Proportional circles indicate densities per 2-km coastal segment (12 km²). The largest circle (Big Lagoon to Trinidad) equals a density of 8.81 birds/km². Areas of old-growth forests are shown inland as shaded areas (from [30]Ralph and Miller 1995; reprinted with permission).
